	American eel

#### Physical Characteristics

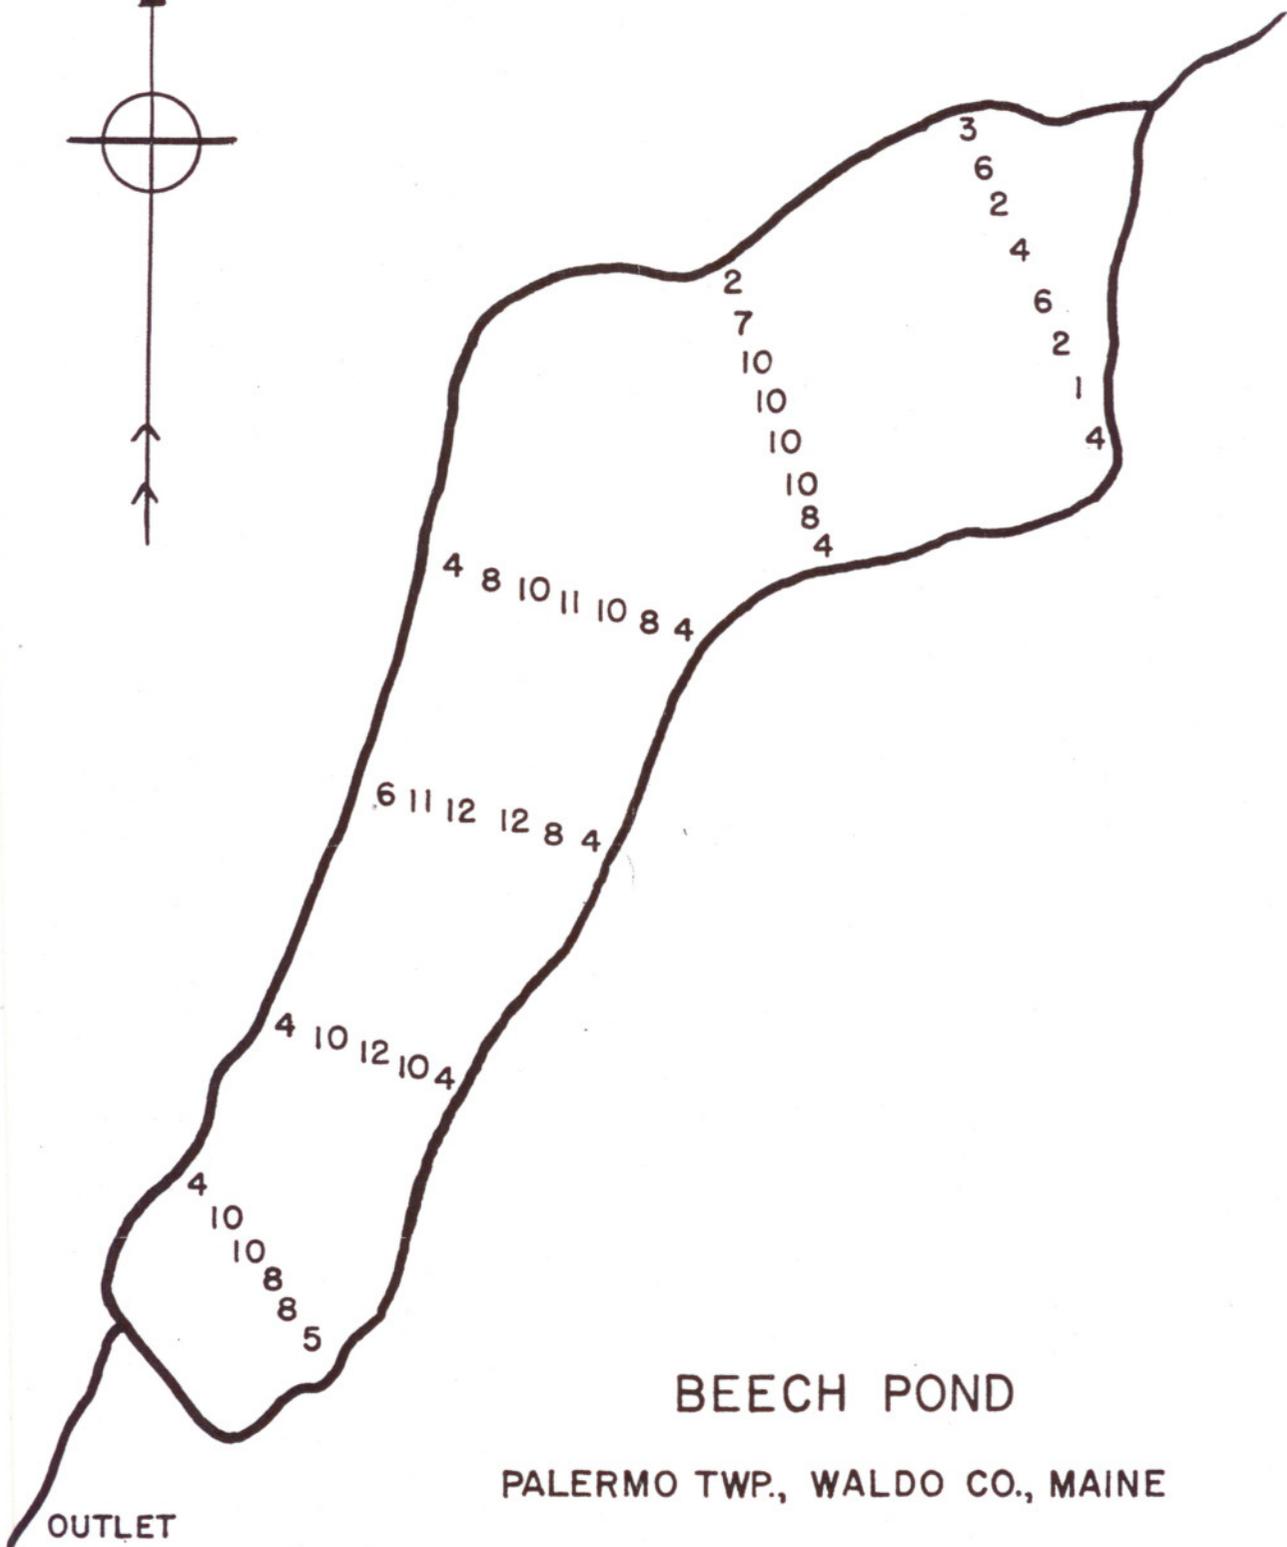

Area - 59 acres	Temperatures
	Surface - 68° F
Maximum depth - 12 feet	10 feet - 68° F

Principal fisheries: Smallmouth bass,  
white perch, chain pickerel

Beech Pond, located in Palermo, drains to Sheepscot Lake via Bradstreet Brook. Access is available off Route 3 with landowner permission.

Beech Pond is relatively shallow, with good habitat for a variety of warmwater species. Smallmouth bass have become established since the original survey and provide an attractive fishery. White perch grow to an attractive size, and are popular with both winter and summer anglers. Chain pickerel are also present in good numbers.

Surveyed - August, 1954  
(Revised - 1992) Maine Department of  
Inland Fisheries and Wildlife. Funded in  
part by Federal Aid in Fish Restoration  
Act under Federal Project F-28-P.
